

## Career Orientation Program by ACCA in association with ISDC

The global demand for contemporary skills is growing fast which underlines the imperative need to have an adequate skill set to face the challenges posed by the shifting paradigm in the work structure. To fill this gap BBD University has tied up with ACCA (the Association of Chartered Accountants) and ISDC (International Skill Development Corporation) to offer ACCA's certificate in International Financial Reporting Standards to its management students.

On September 7, 2017 ACCA in association with ISDC conducted a career orientation program addressed by CMA Milind Date, an experienced management and finance professional with over three decades of professionally successful career in India and abroad, highlighting the importance of IFRS.

The students were made familiar with the growing significance of IFRS as almost 120 countries now require or allow the use of International Financial reporting standards (IFRS) and remaining major economies have established timelines to converge with or adopt IFRS in the near future. The CertIFR course will introduce the students to the principles of International accounting standards (IAS) and IFRS. One will also learn about the history of the International Accounting Standards Board (IASB) as well as recent changes and future developments taking place.
