

ANDROID CLUB & IOT CLUB

The objective of the club is to promote collaborative study and training of students in latest technologies. The Android Club promotes the App Development on the android platform which are most commonly used in all the smart phones. However, IOT Club is providing the platform to the novice to develop IOT based project specifically in Arduino environment. The members of the were selected through an online examination every year. Many activities are being conducted on a regular basis to motivate students to pursue platform development and IOT development.
